

Name of the discipline	CONCEPTS OF WORLD ECONOMIC DEVELOPMENT
Information about the faculties (educational and scientific institutes) and courses of study, students of which are invited to study this discipline	ERI "Karazin Institute of International Relations and Tourism Business", Target audience - 1st year (2nd semester) students of the third (educational and scientific) level of higher education
Contact details of the developers of the work program of the educational discipline, scientific and pedagogical workers involved in teaching	DOVGAL Olena Andriivna, Doctor of Economics, Professor, Professor of the Department of International Economic Relations and Logistics e.dovgal@karazin.ua
Prerequisites for studying the discipline	Not required
Description	The goal of the discipline is to form the necessary theoretical knowledge and practical skills that will allow you to effectively use in practice conceptual approaches to the analysis of models of world economic development at a level that would meet the requirements for the training of doctors of philosophy. Expected learning outcomes. – The ability to solve complex problems based on a systematic scientific worldview, professional ethics and a general cultural outlook – The ability to generate new ideas for the development of the theory and practice of international economic relations. – Ability to integrate knowledge from different fields, apply a systematic approach and take into account non-economic aspects when solving complex problems of international economic relations and conducting research. – Ability to apply modern digital technologies, databases and other electronic resources, specialized software in scientific and educational activities in the field of international economic relations. – Critically think, summarize and analyze phenomena and problems under study, make effective decisions based on modern decision-making methods, logical arguments and proven facts in conditions of limited time and resources. – Apply modern tools and technologies for searching, processing and analyzing information, in particular, statistical methods for analyzing large-scale and/or complex data, specialized databases and information systems. 8 lectures are planned: Lecture 1. Evolution of conceptual approaches to economic development. Lecture 2. Theoretical foundations of world economic development. Lecture 3. Economic growth as a concept of development. Lecture 4. Human development as an economic concept. Lecture 5. The concept of "smart", sustainable and inclusive growth. Lecture 6. Theories and factors of modern economic development.

	Lecture 7. Integral dynamics of world development. Lecture 8. Forecasting world economic development. 8 practical classes are planned: Lesson 1. Evolution of conceptual approaches to economic development. Lesson 2. Theoretical foundations of world economic development. Lesson 3. Economic growth as a concept of development. Lesson 4. Human development as an economic concept. Lesson 5. The concept of "smart", sustainable and inclusive growth. Lesson 6. Theories and factors of modern economic development. Lesson 7. Integral dynamics of world development. Lesson 8. Forecasting world economic development. Forms of monitoring learning outcomes Current monitoring is carried out in the form of practical tasks on course topics, and the final one is carried out in the form of a CREDIT.
